

Casco Bay Estuary Partnership Habitat Protection Fund Fall 2017 Request for Proposals

Overview

The Casco Bay Estuary Partnership (CBEP) is offering grants of \$1,000 to \$10,000 per project to support the permanent protection of targeted habitats in the Casco Bay watershed through its *CBEP Habitat Protection Fund* (Fund). The Fund will be administered through grants from CBEP via the University of Southern Maine, in partnership with Maine Coast Heritage Trust, Maine Dept. of Inland Fisheries & Wildlife, and U.S. Fish & Wildlife Service Gulf of Maine Coastal Program (USFWS).

NOTE: Applicants must provide tax parcel lot/map information to USFWS & CBEP by October 20, 2017. USFWS will then prepare a standard series of maps (described below) to accompany each proposal. Completed proposals must be emailed to CBEP by 5:00 PM on November 10, 2017.

Eligibility

1. Proposed projects must be located within the Casco Bay watershed (see [map](#)), including the Calendar Islands. For further clarification of watershed boundaries, please check with CBEP staff.
2. The focus of the Fund is on protecting lands that are integral to resilient aquatic ecosystems (e.g. coastal, riverine, and freshwater wetland systems). Specifically, proposed projects should incorporate one or more of the following characteristics:
 - a. Shoreline on tidal waters, small coastal streams, rivers, or perennial streams.
 - b. Freshwater or tidal wetlands, including floodplains and naturally occurring vernal pools.
 - c. Salt marsh migration corridors.
 - d. Focus area designation by Beginning With Habitat ([map](#); [factsheets](#)) or other regional habitat-focused conservation plans.
3. Reimbursable expenses must be incurred by December 31, 2018. CBEP will request reports on project expenses claimed as match and leverage, as well as current acreage totals, in August 2018.
4. The Fund cannot be used to reimburse costs that predate the grant application.
5. Grants can be awarded to tax-exempt 501(c)(3) conservation organizations or units of government.

Eligible Expenses

1. Transaction costs associated with acquisition of high value habitat, including: land surveys, attorney fees, environmental assessments, appraisal costs, recording fees, and title expenses.
2. Purchase of a conservation easement on high value habitat.
3. Purchase of fee title to land with high value habitat.

Other costs associated with acquisition, such as stewardship endowments, will be considered in extraordinary cases if it is demonstrated that, without assistance, the project is unlikely to proceed.

Grant Amount

Grants will range from \$1,000 to \$10,000, with a total of \$30,000 in federal funds available through this RFP. An additional \$4,000 in non-federal funding is available for projects within aquatic habitat priority areas mapped in the [Presumpscot Land Conservation: Vision, Values and Priorities](#) (p. 14-15), including the Presumpscot main stem, Mill Brook and the Little, Piscataqua, and Pleasant rivers.

CBEP Habitat Protection Committee

The Fund is administered by a committee consisting of representatives of the organizations listed at the end of this announcement. Applicants may contact any of these individuals to initiate an application.

Requirements for all Properties Protected

1. All lands protected through conservation easement or acquisition must be managed for habitat conservation in perpetuity. The applicant must sign a statement provided by CBEP ensuring permanent protection and management of the property for its natural resource values in perpetuity.
2. Public access, permitted in a manner sensitive to habitat values, must be assured in perpetuity due to the use of U.S. EPA federal funds. The applicant must sign a statement provided by CBEP ensuring permanent public access to the property. (NOTE: Rare exceptions may be granted where conservation value is especially high, and public access would undercut conservation goals.)
3. If intensive land management activities (e.g. forestry, agriculture) are envisioned on the property, those activities must be carried out in an environmentally sensitive manner, consistent with the overarching purpose of protecting high value habitat in perpetuity. Applicants anticipating intensive land management activities for non-habitat values must review these activities in the proposal and describe legal and other mechanisms for ensuring compliance with management goals.
4. In outreach efforts associated with land acquisition (e.g., written materials, public ceremonies, discussions with key partners), CBEP requests appropriate recognition as a partner involved in supporting the land protection initiative. CBEP will supply a logo for visual presentation purposes. In written materials, we request that “Casco Bay Estuary Partnership Habitat Protection Fund” be credited as co-administered in partnership with the U.S. Fish & Wildlife Service Gulf of Maine Program, Maine Coast Heritage Trust, and the Maine Dept. of Inland Fisheries & Wildlife.
5. Although it is not currently a requirement to receive a grant through the Fund, the provision of non-federal matching funds for CBEP’s federal contribution to any project is strongly encouraged. This commitment will need to be documented in writing on the organization’s letterhead.

Application Process

The process for applying is as follows:

1. Interested applicants are encouraged to start by contacting a Committee member to ensure that a proposal meets Fund criteria.
2. Provide tax parcel lot/map information to USWFS & CBEP by October 20th, to initiate map preparation.
3. Applicants should submit an electronic copy of the following information to CBEP:
 - a) Cover letter briefly describing project and requesting funds;
 - b) A completed CBEP Habitat Protection Fund application, OR a pre-existing grant application, with supplemental materials as needed, that addresses the selection criteria and requirements. (Note: All applications must include completed information from p. 1 of the application form);
 - c) Series of habitat maps prepared by USFWS (#2, above);
 - d) An appraisal summary sheet or opinion of value;
 - e) Budget outlining the total project costs, committed funds, and potential funding sources – both for the project and for any planned stewardship/management.
 - f) Two - four photos of the parcel suitable for use in outreach and reporting.

Following review of the application, the Committee may request additional information or a site visit. The Committee aims to finalize funding decisions within 4-8 weeks of the application deadline.

Selection Criteria

The following criteria will be used by the Committee to select projects for funding:

- Protection of land that is adjacent to and/or integral to an aquatic ecosystem (e.g. coastal, riverine, and freshwater habitats);
- High habitat value(s) for fish, wildlife and/or plant communities*;
- Location and size of the project, as well as condition of surrounding land;
- Contiguous with other protected lands;
- Integral to a larger conservation vision;
- Cost-effectiveness of proposal, including matching funds;
- Level of threat from development;
- The potential impact of current uses and/or future land management practices;
- Likelihood of successful implementation (including acquisition and long-term stewardship);
- Community sentiments toward the project, including public access considerations.

*** Note: Habitat values will be analyzed and prioritized using a standardized set of maps prepared by USFWS Gulf of Maine Coastal Program, including:**

- *Beginning With Habitat Riparian Resources*
- *Beginning With Habitat Resources as documented by Maine Dept. of Inland Fisheries & Wildlife, Maine Natural Areas Program, U.S. Fish and Wildlife Service, and Maine Dept. of Marine Resources*
- *Regional conservation lands and Beginning With Habitat Undeveloped Habitat Blocks*

Applicants are also welcome, but not required, to submit additional maps and information such as:

- Land cover maps and aerial imagery
- Applicant-provided site environmental surveys
- Other State, Federal, or NGO GIS-based habitat analyses and models as available
- Local knowledge, site visit observations, and photographs

Proposal Submission

Applications will be considered complete when all fields in the application form have been answered and the mandatory maps have been included as attachments. Applications must be provided to CBEP in an electronic format, and preferably via email, to Matthew.Craig@maine.edu by 5:00 pm on November 10, 2017.

For additional information contact CBEP at 207-228-8359.

Briefly describe ecological / habitat values for fish, wildlife, and/or plant communities. Indicate how you identified the ecological/habitat values (e.g., formal or informal biological inventories, local naturalist, statewide databases such as *Beginning with Habitat*, literature). Provide relevant documentation if appropriate.

How is the property currently being used or managed? What recreational or commercial uses will be permitted on the property once it is permanently protected?

Are there any structures on the property? If so, how are they used, and what will happen to them once the property is permanently protected?

Are there any conservation easements, other easements, rights of way, or deed restrictions currently on the property?

What are the community sentiments toward the project?

Describe the current condition of surrounding lands. Is this project part of a larger conservation vision, and is it adjacent to existing conservation lands?

Please describe the level of threat from development.

Describe long-term management goals, including public access and land management, for the property (ies) involved in this proposal. How will these goals be met and maintained?

Current Property Owner(s)

Address

Is there a written agreement on the property (i.e., Purchase and Sale, Option, or Right of First Refusal)? If not, please describe the level of commitment that the landowners have expressed toward the project.

How will CBEP funds be used? Please be as specific as possible.

**Total purchase price of
property or easement (\$)**

**Fair market value for the
property or easement (\$)**

**Source and date of market
value estimate (provide
attachments if applicable)**

Amount requested (\$)

Total cash raised to date (\$)

Projected closing date

**Pledged match
amount (\$)**

I (we) understand that permanent protection and public acknowledgement of funding from the CBEPHPF are requirements of projects funded by the Casco Bay Estuary Partnership Habitat Protection Fund. I(we) agree to meet these requirements. I (we) also understand that the CBEPHPF requires the establishment of ecologically-sensitive public access.
