

When your car is leaking oil on the street, it's not just leaking oil on the street.

That leaking oil travels from car, to street, to storm drain, and then into Casco Bay.

Just imagine the number of cars driving around the 42 towns of Casco Bay's watershed – from Bethel to the Bay – and the amount of petrochemicals from badly maintained vehicles, leaky gaskets, and radiators that ends up in our waters, streams, and ultimately in the Bay. In our marshes and clam flats. But you can help.

Don't leave a sheen. Maintain your car.

Because
it all ends up here.
