

IT ALL BEGINS WITH HABITAT

Free Virtual Workshop Thursday May 6th, 3-4:30pm

Zoom into your local ecosystem with this interactive demo on the Beginning with Habitat toolbox! Find out how these tools can support your community's conservation goals by providing comprehensive information on the location and quality of waters, wetlands, plant and animal habitats, and large unfragmented landscapes statewide. Learn about other conservation tools available.

Presenters will be Amanda Cross, Program Coordinator, and Michelle Warner, Cartographer, Beginning with Habitat, Maine Division of Inland Fisheries & Wildlife.

We encourage conservation commission and planning board members, other municipal board members, municipal staff, and other interested parties to attend.
