

CONSERVATION CITIZEN SCIENCE

Using your phone to help manage public parks & trails

Tuesday, June 7 5:30-7:30 (Rain Date June 8) | Free
Bug Light Park, South Portland

Join us for this family-friendly workshop! We'll introduce you to the core uses and functions of Litterati, Water Reporter, iNaturalist, iMapInvasives, and ArcGIS Survey 123 before you try them out by collecting and entering data. These apps can be used by Conservation Commissions, "Friends of" groups, land trusts, and other groups to manage their properties internally or can be opened to the public to help you collect information.
